## Why is web3 important to you?

1.

Web3 is a revolution. It's already changing the way people use the technology and the money. It's decentralizing and democratizing by giving people the control of what they're using not only as a consumer or prosumer (producer and consumer) but as owners of the technology.

## What current challenge do you believe web3 will solve?

2.

The next steps I think should be on usability and teaching. Usability to make web3 more accessible to common people and education to let them know what it is exactly that they are doing.

## What would you like to accomplish as a Graph Advocate?

3.

I would like to welcome people that recognize me as the person who allow them to enter web3 in an understandable way. On the other hand, I want to build the technology that will be used in the next years.

## What are you most excited to learn more about in The Graph ecosystem?

4.

I want to learn Rust to be able to understand how The Graph is working under the hood.

## Which of your fellow Advocates would you like to shout out?

5.

There are many of them that inspire me all days. I don't want to forget anyone, but Lorena @blockya, Jorgelina @blocklatina and Tom @tomraw are the closest ones.
