

# GRAPH ADVOCATES SPOTLIGHT

ISSUE #29

Welcome back to the Graph Advocates Spotlight. This week we are showcasing Advocate **Constantin Promesse Juste!**

But first, let's take a quick look at this week's news in The Graph ecosystem.

## COMMUNITY ROUNDUP

- Graph AdvocatesDAO launches [bounties via Dework](#)
- Messari publishes [State of The Graph Q4 2022](#)
- Dapplooker: [New record of subgraphs queried on mainnet](#)
- [Graph AdvocatesDAO Turns 1 Year Old](#)
- Twitter Thread by GRTiQ about [The Graph's use of AI](#)
- [The Graph sponsors \\$5k at ETHforAll Hackathon](#)
- [Eva Beylin presents at ETHLTV](#)
- [Indexer Office Hours #93](#)
- [GRTiQ Episode #102](#) with Alejandro, Co-Founder of Korbit
- Two new Graph AdvocatesDAO community grants [posted in the Forum](#)

## UPCOMING ADVOCATE EVENTS

**Role Chat:** Event  
Evangelist

**Date:** 2/9/23

**Time:** 4pm UTC

**Hosted By:** Chidubem

**WASM By Example:**  
Session 1

**Date:** 2/13/23

**Time:** 4PM UTC

**Hosted By:** Alex

**The Graph**  
**Participant Meeting**

**Date:** 2/14/23

**Time:** 5pm UTC

**Hosted By:** Darby

# ADVOCATE SPOTLIGHT

- **Name:** Constantin Promesse Juste
- **Advocate Role(s):** Community Care, Content Creator, Event Evangelist, Technical Teacher, Text Translator
- **Region:** Bruxelles, Belgium
- **Advocate Wave:** Wave 4
- **Social Media:** JustConstant1 (Twitter/Telegram), constant124#6784 (Discord) @zhenshi.lens
- **Background:** I have lived in Kenya, South Africa and now Belgium. I am passionate about technologies and learning from people from other cultures. Recently with @pcfk#4875, we just created a team around subgraph, dapps development and events called Ujima One.

## 1 Why is web3 important to you?

Web3 is a great innovation for rich countries, but it is a huge advancement for developing countries or areas with unrest due to war or political instability. Nowadays, there is still too many people that are unbanked or countries that are put aside for investments because of thrust, corruption, instability, and I really think blockchain could help in some manner. It also creates a whole new economy and ways to interact with each other thanks to tokenization and NFTs.

## 2 What current problem do you think web3 can solve?

I think Web3 can help create a fairer world where you actually have more control of your data, prevent censorship, some engineers are even working on an algorithm that can fight against fake news. It can also be quite useful when you want to set up a contract with someone you really don't trust or don't want to trust. To put it in a nutshell, I really think web3 will disrupt every industry in some way (interactions with the costumers, copyrights for artist, legal contract, etc.). We can already see that with the move of parent company Facebook that changed the name of their company to Meta because they could be rendered irrelevant with the metaverse adoption.

# ADVOCATE SPOTLIGHT

1

## What inspired you to select the Advocate role you've chosen?

What motivated me for the roles I chose are the people I met during events and my team in Belgium. I first decided to become a translator because the first time I presented The Graph to my friends in order to convince them to build subgraphs with me, their first issue was the language. They understand English but some technical concepts are always better explained in your mother tongue (or a language close to that level of proficiency), to prevent misconception and people losing interest. I chose Web3 Welcomer and Event Evangelist because I love to meet people from different backgrounds and also wanted to create events in Belgium but sadly my network in Web3 was too weak at the time to organize one. So I decided to attend multiple events to first strengthen my network, the awareness about the protocol locally, and to prospect speakers from other web3 efforts to have special guests for the events I would like to organize in the future. Last but not least, I chose for Technical Teacher because I love human interaction and I want to test my knowledge. My logic was: if am able to explain it to someone else and answer every question on the topic, I probably understand it.

2

## What other crypto communities or projects are you involved in?

After listening to Derek's podcast, I was really pumped up and wanted to start a team. So with @pcfk#4875, a new advocate and a dev, we created a team called Ujima One that would specialize in organising events, dapps, and subgraphs development. We are planning to organize a big event in collaboration with Brussels DAO.

3

## Which of your fellow Advocates would you like to shout out?

I would like to thank Colson for his never dying enthusiasm, his great speaker talent during the events and all the help he has given me. From the very first time we met, he has been so welcoming and supportive for the events and the effort I tried to put forward, even when I did not believe in them. I would also like to thank Mack for the RUST teaching he gives to my teammate @pcfk#4875. I would also like to thank Julianna for helping me find people to revise my translations. Armando and J3rôme thank you so much for revising my translation!!

# DATA DEPOT

Welcome back to Data Depot! Here we share the key weekly metrics of The Graph protocol. You can find additional network data on [The Graph Explorer](#) and the custom [Data Depot DappLooker Dashboard](#)

**New  
Subgraphs**

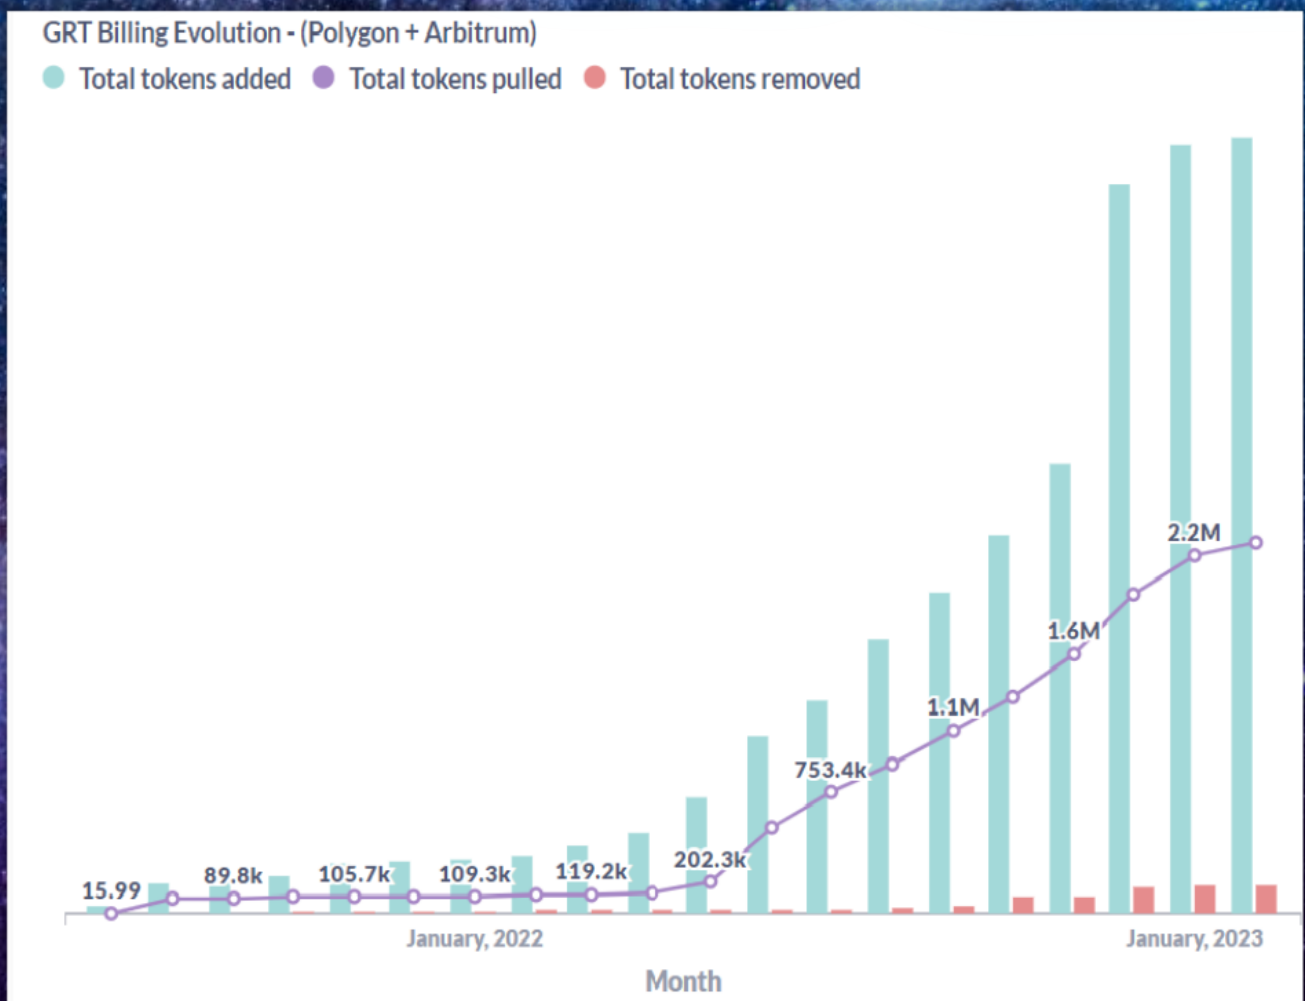

**7**

**New Query  
Fees**

**47K**

**Total Query  
Fees**

**2.3M**

**Total Mainnet Subgraphs: 680**
