

GRAPH ADVOCATES SPOTLIGHT

ISSUE #35

Welcome back to the Graph Advocates Spotlight. This week we are showcasing Advocate **Andy Schreiber**!

But first, lets take a quick look at this week's news in The Graph ecosystem.

COMMUNITY ROUNDUP

- [The Graph Community Talk #21](#)
- [Activity Feeds feature](#) added to The Graph mainnet
- Graphrica & Graphtronauts [hosting subgraph hackathon - "SGHack"](#)
- [Monthly Core Dev Updates](#) from StreamingFast & Messari
- Eva Beylin featured on [The Defiant podcast](#) & [Coindesk article](#)
- [Dapplooker publishes Graph Billing learning series](#)
- [POI Radio Demo](#) by GraphOps
- [Graph Core Dev Call #19](#)
- [GRTiQ Episode #108](#) featuring Darby of Graph AdvocatesDAO
- [Indexer Office Hours #99](#)
- [The Graph Central #9](#)
- Five new Graph AdvocatesDAO community grants [posted in the Forum](#)

UPCOMING ADVOCATE EVENTS

The Graph Core Dev Call #19

Date: 3/23/23

Time: 5pm UTC

Hosted By: E&N

Learning Series:

Firehose 101

Date: 3/30/23

Time: 3pm UTC

Hosted By: Nick

Graph Advocates Onboarding

Date: 4/12/23

Time: 3pm UTC

Hosted By: Alex

ADVOCATE SPOTLIGHT

- **Name:** Andy Schreiber
- **Advocate Role(s):** Content Creator, Text Translator
- **Region:** Germany Koblenz
- **Advocate Wave:** Wave 8
- **Social Media:** TheGraph|Germany#3329 (Discord), @german_TheGraph (Twitter), t.me/TheGraph_Germany (Telegram)
- **Background:** In November 2019 I founded The Graph Germany Community with 4 other enthusiasts because there was hardly any information about The Graph in German. As you surely know, more communities were to follow. My path led me from the world of car trading to the world of cryptocurrencies & community building. Who knows where it will lead me next?

1 Why is web3 important to you?

Web3 is important because it represents the next evolution of the internet, where users have more control over their data & digital identities. Its based on blockchain technology, which provides decentralized, transparent, and secure systems that support a range of applications & use cases. You get greater privacy & security when accessing online services & sharing your data. You can also participate in DeFi applications, which provides more inclusive & accessible financial services than traditional banking. In addition, Web3 enables new forms of digital ownership and value exchange, such as NFTs and decentralized marketplaces, which can provide creators & users with new ways to monetize & exchange digital content. Overall, Web3 is important for anyone who wants to have more control & autonomy over their digital lives, and wants to explore new possibilities for innovation, collaboration, and value creation in the digital economy.

2 What are you most excited to learn more about in The Graph ecosystem?

I am excited to finally meet everyone in person and work together to promote community development, strengthen our bonds, gain a better understanding of the tasks of indexers & curators, eager to witness the further decentralization of The Graph, and be an active part of this community to make a difference together.

ADVOCATE SPOTLIGHT

3

What inspired you to select the Advocate role(s) you've chosen?

Well, at first, I was very hesitant to take on the role of Graph Advocate. I had too many doubts about whether my knowledge was enough and if my English was sufficient to communicate like I do in German. Over the years, I've forgotten some words as I don't speak English constantly. It was only after Oliver encouraged me and later my friend Liam from GRTDatahub, with whom I've been running the community since the end of March 2022, that I felt motivated to take on the role. Many of you have also encouraged me to finally do it.

4

What inspired you to select the Advocate role(s) you've chosen?

As a Graph Advocate from the German-speaking area, I would like to promote the acceptance of Web3 technologies & The Graph protocol. I want to share my knowledge and experience to help others understand & leverage the power of Web3 & The Graph. I also want to play an active role in communities by initiating discussions, answering questions, and helping to build an open and inclusive community. I believe that a strong community is an important factor in the success of Web3 & The Graph. As a Graph Advocate, I also want to support projects & developers building on The Graph by giving them feedback, helping them solve problems, and encouraging them to participate in the community. Overall, I want to help promote Web3 & The Graph as important & forward-looking technologies that can help build a fairer, more transparent, and more decentralized digital future.

5

Which of your fellow Advocates would you like to shout out?

Although it makes me sad that Oliver, who motivated me to enter The Graph ecosystem, is no longer with us, I'm grateful for the many great people who have accompanied me. Starting with Colson, to Liam, Paolo, & Derek from DataNexus. Liam & I have built a friendly relationship & pushed forward GRTDataHub together. Colson supported the early stages of The Graph Germany community with his technical understanding. Derek impressed me from the beginning with his genius & helpfulness. Paolo is a wonderful person with whom I have built a friendly connection. We are almost the same age & see things differently than in our younger years. His genius in formulating & impressive knowledge go hand in hand with great helpfulness. There's also many other great people who accompany me.

DATA DEPOT

Welcome back to Data Depot! Here we share the key weekly metrics of The Graph protocol. You can find additional network data on [The Graph Explorer](#) and the custom [Data Depot DappLooker Dashboard](#)
