

# GRAPH ADVOCATES SPOTLIGHT

## Issue #18

Welcome back to the Graph Advocates Spotlight! This week's Contribution Spotlight is highlighting the Subgraph Documentation work by **Paul Barba**.

But first, lets take a quick look at this week's news in The Graph ecosystem.

## Community Roundup

- 4 new Graph AdvocatesDAO Community Grants submitted. Get involved in the review process by posting your questions and comments in [the Forum](#)
- The Graph announces it's [2 Year Birthday Events](#) in Amsterdam, Buenos Aires, Dubai, Lagos, San Francisco, and Singapore on December 17th
- The Graph & Push Protocol announce a [dApp Development Workshop](#) at ETHIndia
- [The Math Behind Web3 Article](#) by Max Tang
- [Article by Request](#) on why they migrated their Subgraph
- [Building Decentralized, Serverless Applications Workshop](#)
- Indexer Office Hours #85
- [GRTiQ Episode #91](#) with [Suhail Kakar](#)

## Upcoming Graph Advocates Events

**Role Chat:** Text Translator  
**Date:** 11/25/2022  
**Time:** 7am PST  
**Hosted By:** Lorena

**Code Along:** React Session 3  
**Date:** 10/29/2022  
**Time:** 10am PST  
**Hosted By:** Alex

**Role Chat:** Wave 7  
**Date:** 11/28/2022  
**Time:** 7am PST  
**Hosted By:** Nick

# CONTRIBUTION SPOTLIGHT

## Subgraph Documentation

By Advocate Paul Barba

### What is subgraph documentation and what value does it provide?

Subgraph documentation is a way for projects to display and explain their subgraph by providing information about their subgraph and display the entities of the subgraph in a manner that is more visually appealing than how it is displayed in the subgraph schema. We also include query examples for the subgraph to help exhibit the functionality of each subgraph and to help display the information you can query using this subgraph by displaying how the query should be configured.

### How did you get into subgraph documentation, and why does it interest you?

I have used DataNexus as resource for asking questions. He has always been a wealth of knowledge and is able to explain complicated items in an easy to understand manner. I happened to ask him questions about his work at the time, when he was working on documenting the subgraph for Rocketpool and Juicebox. One night he decided to just show me and let me get a crack at actually working on Juicebox docs. It definitely sparked my interest and with his help I moved onto another project, then another.

It interests me since it is a way to take a peek into the developer world, working on Github, networking with projects and testing and learning. It's also a way to help the Graph, help the specific project, help Web3, and even benefit yourself by learning and helping your investment with the Graph. Prior to crypto, I invested in traditional finance and stocks. It would be impossible to propose helping out Google or Amazon investment for example without actually becoming an employee of the company in some fashion. The subgraph documentation is a small contribution, but it is cool to view a project's Github and see yourself as a contributor and know you had a small part in the big process.

# CONTRIBUTION SPOTLIGHT

## Subgraph Documentation

By Advocate Paul Barba

### **Who is currently providing subgraph documentation and how can other Graph community members contribute to this initiative?**

As of now it is a small group of Advocates (Myself, Chidubem, and Pakaliscious) that have been working on the documentation. However, more and more Advocates seem to be interested in contributing. If interested, you can apply to become a Graph Advocate and join the Technical Teachers group, or if you are currently an Advocate, then jump into Technical Teachers channel.

### **How many Subgraphs have you created documentation for thus far? What's your ultimate goal?**

I have worked on 12 total with putting in PRs (pull requests), 8 of which have been implemented and 4 still pending. I do not have an ultimate goal in terms of how many I could complete. My driving motivation was to learn and by getting more and more under my belt, I was able to learn at a fast pace. Another goal is to help others learn and develop and share what I have learned.

### **How can Subgraph Developers contact you to request documentation for their Subgraph?**

They can contact me via Discord PaulieB#0047 or Telegram @Crypto\_Paulie\_Walnuts, but they can also just submit their request using this link - <http://sgdocs.graphadvocates.com/>. This link routes their request directly to the Advocates DAO where an Advocate can be assigned the request. You provide links to your Documentation repo link, Subgraph URL, Subgraph repo URL, and point of contact for questions.

# Data Depot: Epoch 691

Welcome back to Data Depot! Here we share the key weekly metrics of The Graph protocol. You can find additional network data on [The Graph Explorer](#).
