Advocate Spotlight

- **Name:** Tim Seip
- **Advocate Role(s):** Community Care, Event Evangelist, Web3 Welcomer
- **Region:** European
- **Advocate Wave:** Wave 2
- **Social Media Handles:** Pixel#1812 (Discord) @tim_seip (Twitter)
- **Background:** My name's Tim and I'm a 24 year old, recently graduated, developer in a Web2 company. I live in the Netherlands and my main drive is discovering new and exciting things. Web3 is just my latest interest among many in the years, among which retro games, now music festivals, and much else!

Why is Web3 important to you?

1. Web3 is important to me because of the philosophy behind it. I don't necessarily believe in all the vague applications people are trying to come up with for blockchains and the like. I do however strongly believe in the philosophy of openness and open source, as well as decentralization. I think that these will be Web3's greatest contributions.

What is a current challenge you believe web3 will solve?

2. I would love to grow my local community much more. Countries around me seem to have found their footing and are organizing local meetups, have The Graph communities, etc. Sadly in the Netherlands I haven't been able to find the people to really grow a The Graph Netherlands community and organize events and the like, so that's my goal!

What Graph Day Announcement did you find most compelling, and why?

3. The sunsetting of the hosted service of course! This is the number one most important step the ecosystem could take to really realize the vision of an open decentralized network, and I'm here for it!

What are you most excited about to learn more about in The Graph Ecosystem?

4. I am excited about the hosted service and the moving of Subgraphs and chains to the decentralized network. I am going to attempt to participate in the MIPs program & set up an indexer of my own, so I think this would be very interesting to learn more about.

Which of your fellow Advocates would you like to shout out?

5. I would like to shout out Martin Montero for being a real worker in the Advocates program. Martin helped organize a hacker house space near EthMexico, which I was lucky enough to see, & is now doing the same in Canada, I've personally seen his work and he is super dedicated to promoting the Graph. We need more Advocates like him!
